

GLORY

## D-100 series

Remote display

The D-100 builds trust between you and your customers by clearly displaying count information on the bright LED screen, allowing them to easily confirm the total value and quantity of banknotes counted. Ideal for high volume cash environments, the D-100 connects to and enhances the functionality of a wide range of Glory banknote counters and sorters.

# The D-100 is a dependable and affordable display, with a compact design it can be positioned in any location to meet your unique banknote processing requirements.

## Clear presentation of information

A bright, 4 digit and 8 digit LED screen clearly displays count information to the customer, allowing them to easily confirm the total value and quantity of banknotes counted at a glance. In addition, four different coloured lights indicate the status of the cash processing equipment the display is connected to. This makes the D-100 ideal for use in a store, bank branch, casino applications or any internal security function.

## Fits any environment

The D-100's compact design allows it to be positioned in any location in order to meet different customer and banknote processing requirements. Its contemporary and premium design complements the surroundings of all cash handling organisations and the highly durable polymer housing makes the display ideal for high volume cash environments.

## Easily confirm the total value and quantity of banknotes counted with your customer
