CashInsight™ Assure

Comprehensive, easy-to-use
teller application.

CashInsight™ Assure

SIMPLE, FLEXIBLE AND COMPREHENSIVE TELLER APPLICATION

CashInsight Assure is a comprehensive, easy-to-use teller application enabling Teller Cash Recyclers to perform all teller transactions.

- Deposits
- Withdrawals
- Reporting
- Journaling transactions
- Multi end-of-session
- End-of-day balancing
- Scheduled self-audit

CashInsight Assure empowers your front-line branch staff to serve customers more efficiently. Offering a simple, flexible, and comprehensive multi-vendor software platform, CashInsight Assure immediately provides your branches with uniform functionality, common interfaces, and the same 'look and feel' across all your teller automation devices, stand-alone or integrated, so that maximum benefit is achieved in the shortest time; with minimum cost and risk.

Stand-alone

CashInsight Assure sits alongside a bank's core system application and provides highly effective and efficient control of teller automation devices with no impact on current systems.

Integrated

CashInsight Assure provides a valuable extension to a core system for the management of teller automation devices.

Integration of teller automation devices within a Bank's core system enables frontline staff to serve customers even more efficiently. Multi-vendor support provides consistent handling of all connected devices and the ability to grow with your business processes and your device choices.

MAXIMISE THE VALUE OF YOUR TELLER
AUTOMATION ASSETS WITH THE POWER OF DATA

CashInsight Assure stores its data in an industry standard (SQL) database that allows a single database to be used for an entire branch or organisation.

Flexible teller workstations

A teller can logout of one workstation and move seamlessly to another workstation, or device, without balancing each time. CashInsight Assure will encompass all of the workstations and devices that a user worked on during the day.

Tailored reporting approach

Managers have access to configurable reports that summarise individual or multiple tellers' activities by name, transaction type, device type and more.

Enterprise solutions (option)

With centralised administration, larger teller automation deployments can be managed in multiple branches. This helps an enterprise to efficiently manage reporting and cash inventory visibility in their entire network.

User Summary

CASHINSIGHT ASSURE DELIVERS BUSINESS BENEFITS ACROSS THE ENTERPRISE

- A common teller interface that can be used across a range of teller automation devices to provide immediate teller productivity and efficiency.
- Flexible integration and scalability, tailored to meet budgets and business priorities
- Branch and Enterprise-wide reporting to enhance centralised business information and control procedures.

Multi-vendor application

- CashInsight Assure supports Teller Cash Recyclers from many different manufacturers and, thereby, provides a multi-vendor platform for meeting customers' current and future requirements.
- We are constantly adding new integrations to our software.

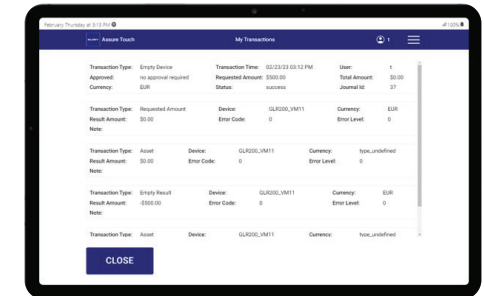

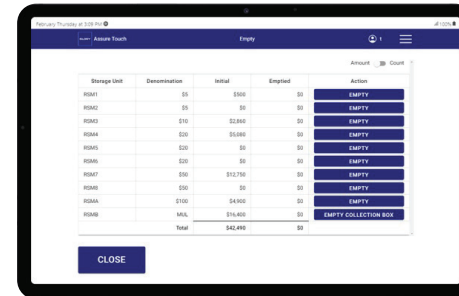

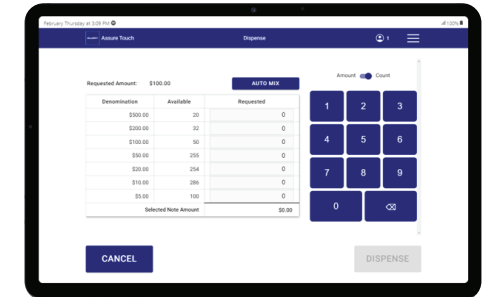

The n-tier architecture of CashInsight Assure brings multi-vendor and multi-device capabilities in a standardised but flexible form, while building on a proven, reliable middleware solution. New devices can be introduced by adding new drivers, without impacting teller workflows. Clear boundaries ensure that each software layer delivers de-coupled capabilities that ease support, maintenance and future development; all designed with today's distributed computing environments in mind.

THE **TABLET INTERFACE** FREES TELLERS FROM THEIR **WORKING STATIONS**

By using Glory's tablet application, multiple tellers can share teller cash recyclers and operate transactions anywhere in the branch. This improves teller mobility and enables flexible branch layouts.

Cash automation devices to be installed without the need for separate counter space for each device, moving from a full-service static counter to a flexible and mobile environment.

Tellers can perform customer consultations away from cash handling devices while still offering cash services. This transforms a teller's role to a more consultative approach, to help branches achieve their profit goals.

A highly intuitive user interface ensures that tellers can work with maximum efficiency. In addition, user assistance by simple video guidance is available from anywhere within the system.

Stand alone or integrated, via desktop or tablet, CashInsight Assure provides you with comprehensive accounting functions and easy-to-use reconciliation features so your branches can accurately handle all primary cash transactions.

Screen resolution	1024 × 768 (minimum)
Hard disk space for installation (excluding Java)	2GB (minimum)
Java environment	Java SE 11 64-bit
Database storage	30 KB per Transaction (Size may vary depending upon the device type and its configuration.)

Recommended minimum requirements	
Processor speed	2 cores (minimum)
RAM	1 GB minimum exclusively reserved for running CashInsight services.

Specifications are subject to change without notice. Please read the instruction manual carefully to ensure correct equipment usage. All figures, capacities and speeds quoted in this brochure are as tested by GLORY LTD. They may vary depending on usage conditions and are not guaranteed.
