CashInsight™ Assure High Availability

Helps your teller automation network
perform at its highest level.

CashInsight™ Assure

VISUALISE YOUR TELLER AUTOMATION NETWORK FOR THE HIGHEST LEVEL OF PERFORMANCE

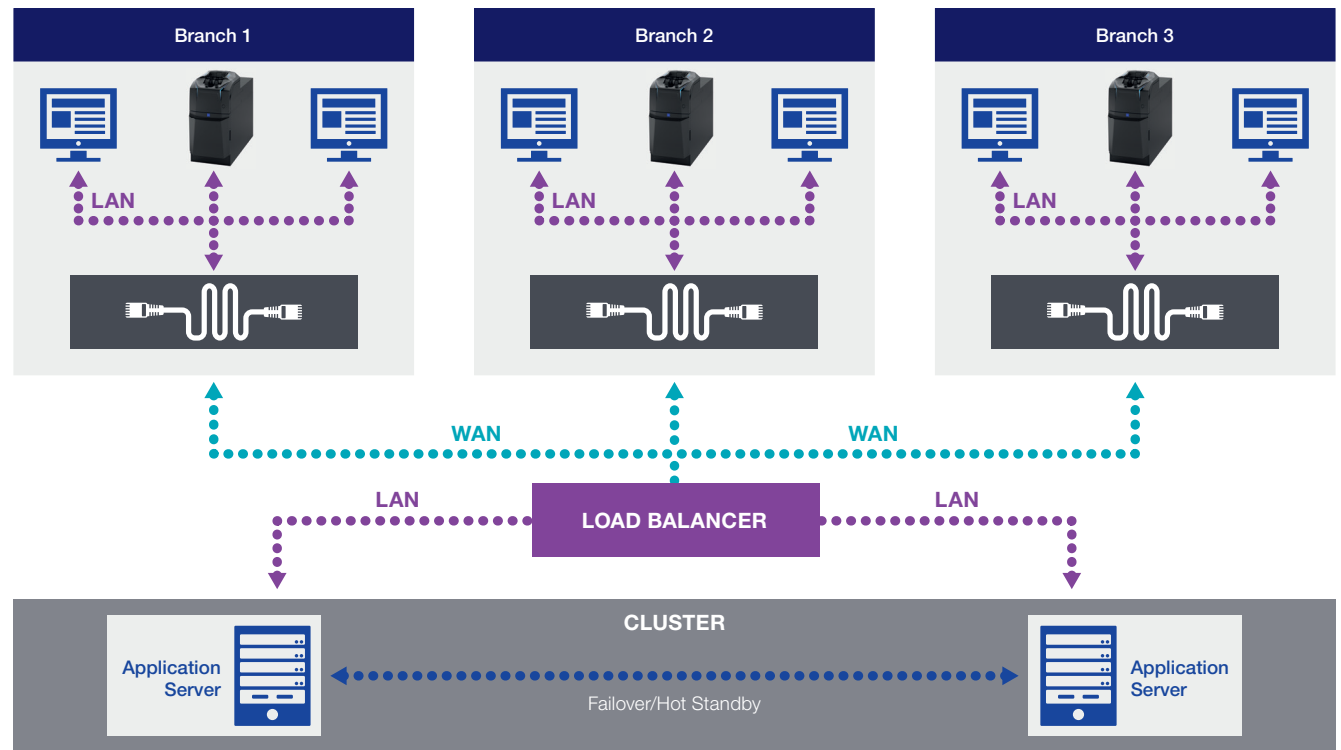

CashInsight Assure empowers your front-line branch staff to serve customers more efficiently and, offers features such as centralised reporting and administration, load balancing, and fail-over protection.

Following a successful feasibility evaluation from Glory's Professional Services team, both existing and new CashInsight Assure customers can benefit from the High Availability solution.

The High Availability solution itself requires CashInsight Assure for each supported teller automation device and the High Availability server component to deliver the benefits of enterprise server management and disaster recovery.

The graphic on the right offers a high-level, conceptual overview of the CashInsight Assure Enterprise High Availability solution.

For more information about the CashInsight Assure solution please refer to our CashInsight Assure brochures.

BENEFITS OF CENTRALISED ENTERPRISE-WIDE DEPLOYMENT

Centralised installation

The enterprise-wide installation of CashInsight Assure increases efficiency and reduces IT administrative overhead.

This hierarchal structure can be represented through a view of branches, regions, or the overall corporation. Each layer can be assigned its own access permissions (for example, the right to view only one particular region or branch). This ensures the proper levels of permission and security are aligned to a particular user's role within the bank.

BENEFITS OF CENTRALISED INSTALLATION

- Uniform processes, reporting and configuration principles throughout the organisation
- Centralised consolidated reporting options, based on information gathered from the entire enterprise (branch, regional or enterprise reports)
- Users can have permissions to more than one location
- Support centralised management of roles and users, including the ability to interface into Active Directory
- Flexibility to move employees to other branches in times of need, since user profiles are managed centrally
- Easier to maintain and deliver updates

Disaster Recovery for continuous performance even in the event of server failure

CashInsight Assure High Availability ensures that even if a server fails where CashInsight Assure is installed, the teller can continuously use CashInsight Assure as it enables a "fail-over" capability which manages a parallel set up of CashInsight Assure. The teller can use all features of CashInsight Assure while the server is being repaired.

Fallover/Hot Standby

Application Server

Load Balancing for optimal network performance

In an enterprise server environment, the High Availability solution assigns tasks to less active servers in the network; thereby optimising network performance, especially during peak business hours. This increases network efficiency as workloads can be shared between servers, which also helps maximise the return on IT resource investment.

The CashInsight Assure Enterprise High Availability solution requires a separate evaluation by the Glory Professional Services team to ensure that this solution can be implemented within your specific IT environment.

Clients

Load Balancer

Servers

CashInsight Assure High Availability provides you with comprehensive accounting functions and easy-to-use reconciliation features so your branches can accurately handle all primary cash transactions.

Compatible application servers	Servers based on Java EE 5 Specification Tested with: WebSphere 8.5 and 9 JBoss® EAP 7.2 and later Wildfly (JBoss® AS) 14 and later
Compatible Databases	Oracle® 12c and higher SQL Server 2016 and higher

Authentication and authorisation	Active Directory/LDAP/LDAPS support Database authentication and authorisation
Other security aspects	Supported security certificates (SSL – on load balancer or web server)
Supported Devices	CI-10C, CI-10CX/BX, CI-50BX, InstaChange™, TCD 9000, RBG-100/200, Vertera™ 6G, GLR-100/200. Devices must be configured for network connectivity

Specifications are subject to change without notice. Please read the instruction manual carefully to ensure correct equipment usage. They may vary depending on usage conditions and are not guaranteed.
