CASH360™

End-to-end cash management
for Hotels

What is CASH360?

CASH360 is a secure and integrated cash management and collection service from G4S using Glory's CASHINFINITY™ note and coin recycling solutions.

When your hotel accepts payments by cash, you are spending extra time and money every year on managing cash flow processes. CASH360 reduces these costs while increasing security and operational efficiency.

How does CASH360 work?

When cash is deposited into the Glory CASHINFINITY recycler, it is verified, counted and securely stored with a full audit trail of every transaction made. The deposited amount can be credited into your bank account while the notes and coins are still on site in the device. Then, with the software, you can see your cash flow in real time. G4S use this information to continually monitor your device cash levels. With automated collection alerts you can optimise collection frequency in line with your business cash volumes.

We take care of it all starting with a site survey, then agreeing the optimum location for the device, installation, training, and helpdesk support when required.

For more information on how CASH360 can help your hotel contact Glory today:
