THE CHALLENGE

BaRRa de Pintxos is a Spanish franchise chain in the Restaurant sector, that was founded in 2010 with a double objective to: incorporate a sophisticated hospitality venue brand while incorporating new technology to restaurant management, and to market its franchise for a national expansion strategy. In a short time, the BaRRa de Pintxos franchises have become a booming businesses, thanks to its commitment to innovation and the quality of their products.

As a result of constant evolution and growth of the business, BaRRa de Pintxos needed a system to automate and streamline their cash management process, in order to increase employee productivity and optimise the customer service experience.

Another key requirement was that, any solution to be implemented needed to allow BaRRa de Pintxos to perform cash reconciliation processes quickly and without errors, to eliminate cash discrepancies. It was also essential that the solution was able to detect counterfeit notes and coins.
