

DELIVERING CONTACTLESS CASH PAYMENTS

– A Quick Guide

Enhancing the safety of your staff
in the world of Covid-19

COVID-19 HAS CHANGED EVERYTHING.

The Covid-19 pandemic has fundamentally changed in-store retailing around the world. From enforced closures to heightened awareness of hygiene and the need for social distancing the challenges are significant.

But one thing has not changed. Many of your customers still choose to pay in cash and for others it's the only payment method available to them. With increasing unemployment and predictions of a global recession, cash is likely become increasingly important for many more people.

HOW WE HAVE APPROACHED CASH PAYMENTS.

Traditionally, cash payments at the point of sale have involved close physical proximity and, in many cases, physical contact between customer and cashier. Navigating this can cause anxiety for your employees and embarrassment for your customers.

BUT THERE IS ANOTHER WAY.

Glory's CASHINFINITY™ point of sale cash recycling solutions remove the need for your staff to touch cash and maintain social distancing at the point of payment.

SEPARATING CASH FROM YOUR STAFF.

Easily integrated with your existing POS, Glory's recycling solutions are designed to accept cash payments directly from the customer – including counting and authentication. They also automatically dispense change again directly to the customer to complete the transaction.

Your staff never need to touch banknotes or coins again, which also reduces the risk of loss due to cash shrinkage.

TRADITIONAL CASH PAYMENTS.

Traditional cash payments can bring your staff into close, sometimes physical contact with your customers.

AUTOMATED CASH PAYMENTS.

Glory's CASHINFINITY solutions removes the need for your staff to touch cash.

CI-5

THE RIGHT SOLUTION FOR YOUR STORE.

Whatever the volume of cash flowing through your stores, Glory has a point of sale recycling solution to: minimize the risk of Covid-transmission at the point of payment; reduce counting errors; accelerate cash transactions; and enhance customer service.

CI-5 – Specifically designed for smaller retail environments, the CI-5 delivers all the benefits of cash automation in stores with lower cash volumes.

CI-10 – The CI-10 compact cash recycling solution is stylishly designed for easy integration into cash desks and self-checkouts.

CI-50 – The high banknote storage capacity and a certified safe of the CI-50 offer greater security for higher volume locations that can be adapted to various store formats and sizes.
