DE-100T

Banknote deposit solution

The DE-100T transforms the productivity of your back office and provides your business customers with secure counting, authentication and storage for banknote deposits, without the need for staff assistance. Using proven Glory technology to reduce losses and counterfeit exposure, the DE-100T takes care of the cash so you can focus on your customers.

Its compact footprint requires minimal space to conveniently deliver full deposit processing capabilities, as well as a stand-alone value counter.

As the benefits of using the DE-100T are recognised, businesses will find the device indispensable. Using proven Glory technology to reduce losses and counterfeit exposure, the DE-100T will help to create an environment where customer satisfaction is key.

Deposit processing with storage

- **Escrow** – Deposits are held in escrow for approval before being committed to the storage bag.
- **Envelope deposit** – Unfit notes as well as other non-cash items (ex. gift vouchers, cheques and coins) can be manually entered and added to the total. Placed in envelopes, these items can be stored in the storage bag, with no need for a separate process.

Value counting without storage

- **Counting** – Notes are counted at up to 600 pieces per minute. The large infeed hopper can accommodate up to 300 pieces thus reducing count time.
- **Batch counting** – User definable (random or preset) batch size can be chosen to aid banknote counting.

Storage bag with large capacity – easier transportation of secured cash

- The bag can hold up to 10,000 banknotes at a time.
- The contents are secured in the bag via a shutter closure.
- It is also reusable, thus keeping running costs significantly lower.

Highly reliable multi-currency recognition

Glory's highly acclaimed recognition and authentication technologies will prevent the acceptance of counterfeit banknotes. Even inexperienced operators are able to handle both local and foreign currencies in a reliable and productive manner.
