S&N CETIS

CETIS Enterprise Management

CETIS from S&N integrates with Glory retail cash systems to provide transaction data and alerts for real-time status and enterprise visibility. CETIS' open technology, remote management and business intelligence reporting capabilities provide customers a flexible solution to centrally manage cash for all locations.

CETIS is an Enterprise solution that provides central management and visibility of cash deposits, change orders, device alerts and reporting to simplify cash management in retail environments for Glory CASHINFINITY™ solutions.

Features	Benefits
Enterprise software integrates to multiple cash automation systems	Enterprise level transaction visibility on a user friendly dashboard
Configurable real-time device status and transaction alerts by denomination	Minimise service maintenance and costs with proactive alerts
Currency forecasting and change order portal	Decrease cash handling costs with optimised change orders
Business intelligence reporting and analytics	Diminish IT costs with custom reporting, facilitate reconciliation and information sharing
Central administration and remote management capabilities	Standardise operations, centralise control and reduce need for service calls
Electronic posting of Provisional Credit to bank system	Optimise cash flow and business with overnight bank credits for deposits made

Suitable for

- Retailers with multiple cash management systems and store locations nationwide
- Enterprise management, configurable device status, alerts and reporting
- Currency forecasting and change order provisioning
