InstaChange™

Coin dispenser

Dealing with coins is time consuming for your staff and prone to errors which impact end of day balancing. InstaChange provides intelligent, accurate and efficient loose coin dispensing allowing you staff to focus on the customer rather than counting coins and reduces operational costs.

InstaChange accelerates the delivery of change to your customers, reduces errors and enhances the experience your customers receive.

Intelligent functionality

InstaChange automatically dispenses the right amount of change back to your customer. And unless you tell it otherwise, InstaChange will always dispense the least amount of coin required. If selected, InstaChange will intelligently substitute for low channels, further extending run-time.

Revolutionary universal design

An innovative design keeps moving parts to a minimum resulting in a lower cost of ownership and increased reliability.

The universal base supports a variety of coin set magazines making it easy for global customers to maximize in-store equipment inventory and minimize service support variations.

Ease of use

InstaChange's tear drop design makes for easy placement. InstaChange can be positioned in any direction to ensure the coin cup is within easy reach of the customer, cashier or teller.

When InstaChange does require refilling, loose or rolled coin is easily loaded into the coin magazine while it sits either on the universal base or flat on a table. Balancing is aided through the use of color coded calibration labels.

Interfaces

Each unit ships with standard software drivers (OPOS, JPOS) allowing InstaChange to quickly interface with most point of sale systems in use today. InstaChange is also fully compatible with the Glory range of Teller Assist products.
