## Vertera™ ETD

Integrated teller support system

Whether you're looking to transform your branches or simply improve efficiency for increased profitability, the Vertera ETD will support your strategy without the integration costs of a full TCR solution. As a replacement for the traditional teller drawer/pedestal, enabling open plan layouts, faster teller transactions and enhanced customer experience – the Vertera ETD delivers.

## Designed for single teller use, the Vertera ETD enables your tellers to focus on your customers while increasing productivity and security.

**Vertera ETD has been designed to enable automated cash handling and authentication to take place at the teller counter, as a replacement for the traditional teller drawer/pedestal. Vertera ETD provides similar levels of security to the teller drawer/pedestal it would replace; as such there is no safe, RSMs are housed in a 2mm steel cabinet.**

In fact, Vertera ETD can be deployed at many locations where cash is handled and tellers need to deal with customers, such as foreign exchange bureaus, post offices and retail stores.

Vertera ETD is simple to deploy and will fit into a teller workstation with little or no modification to existing furniture. Designed for single teller use, Vertera ETD enable tellers to focus on service excellence, while increasing customer engagement and productivity.

<b>Roll storage system</b>	4 or 6 RSM options Each RSM holding up to 600 notes 4 RSM – up to 2,400 recyclable banknotes 6 RSM – up to 3,600 recyclable banknotes
