QuickChange™

Consumer, self-service coin deposit solution

Offering your customers a faster, more convenient way to deposit coin reduces waiting times, improves teller productivity and enhances customer satisfaction. Make more money from coin: As part of the Glory solution, recycling coin can lead to profit and has tremendous ROI opportunities.

Bin coin collection

QuickChange is convenient and quick. A uniquely designed auto-feed system allows secure, continuous processing of coins and its two-button operation makes it intuitive and easy to use.

Coins can be poured straight into the coin hopper, while hands are kept well away from moving parts. Rogue objects, foreign currency and counterfeits will be automatically separated from the coin mix and rejected.

To assist branch personnel with machine management, QuickChange includes easily viewed status lights located on either side of the front façade. Color coded status lights alert branch staff to QuickChange fill levels providing ample time to empty coin from QuickChange ensuring the solution is always available for customer use.

All processed coins are collected into dual high capacity transportable coin bins. Each bin can hold up to 35,000 mixed coin for a total of 70,000 maximum capacity. Patented technology ensures bins are easy to maneuver, by teller or CIT, when full.

Coin bins are ideal for banks with high customer foot traffic who would like their CIT company to come and collect the mixed coin quickly and simply. Bins are constructed from high impact polyethylene resin providing an extremely rugged solution designed to withstand the rigors of transport and cash center processing.

Speed	2500 mixed coins per minute
Coin diameter range	0.6" to 1.3" (15.5 to 32.4 mm)
Coin thickness range	0.04" to 0.12" (1.0 to 3.0 mm)
