## eVAS CtC

Central Thin Client  
Vault Automation Solution

eVAS CtC is a thin-client solution for a central implementation where the application server and database can be moved from the vault to a central data center. eVAS CtC utilizes 2-Factor Authentication and implements REST Web Services for Database interaction. And, providing all of the functionality found in our eVAS product.

## eVAS CtC – modular and flexible design supports a broad range of processing requirements.

Glory's eVAS CtC solution provides a comprehensive, automated and flexible cash management platform, combined with proven ability to support a wide range of cash vaults' processing operations and activities. Its modular and flexible design supports a broad range of processing requirements.

Responding to rising demand for a central data center cash management solution, Glory offers eVAS CtC. eVAS CtC software solution will improve day-to-day management of the cash handling process – increasing productivity, security and performance.

eVAS CtC provides a full audit trail of cash deposits throughout their journey through a cash vault. Designed to meet all inventory management functions, and reports.

- **Productivity reporting, by customer, by teller, by shift, by currency chest**  
Fully manage and control cash center operations and identify best practices
- **Visibility, control, audit trail**  
Real time view of cash balances and a full, searchable record of activities
- **Regulatory compliance**  
Conform to local regulations (internal and external)
- **Conformance to Service Level Agreements for cash processing**  
Monitor and demonstrate adherence to service levels
- **Lower security risk, better risk management**  
Full traceability of cash to individual teller level with automated supervisor function
- **Customer service, MIS (Management Information System)**  
Provide customers with fast access to information
- **Resource management**  
Plan workflows and balance with shift patterns
- **Inventory management**  
Manage stock levels efficiently, right down to denomination and fitness level detail
- **Optimized processes**  
Automated workstreams by client, ensuring cash is processed in optimal fashion
- **Faster, more accurate discrepancy management**  
Integrated counting devices and pre-advised declared balance for instant discrepancy management
- **Grows with your business**  
Scalable architecture for single site operations up to multi-site enterprises
- **Opportunity cost**  
Productivity improvements free up capacity to attract more and new business

## Complete process control of cash center workflow

### Core functions

- 1. Logging**  
Receiving and Logging of deposits into the cash center and assignment of work to containers or individual tellers.
- 2. Deposit processing**  
Counting and reconciling deposits, with interfaces to a large range of banknote sorters and coin devices.
- 3. Inventory**  
Managing inventory levels within the cash vault.
- 4. Orders**  
Preparing orders for ATMs, bank branches and retailers. Orders can be entered manually, imported from a file or via the eVAS Orders Web Service application for both cash vaults and virtual vaults.
- 5. Administration**  
Configure eVAS CtC to the workflow needs  
Location and account profiles can be added to eVAS CtC manually, imported from a file or via the eVAS Master Data Web Services application.

eVAS controls the physical path of the cash through the cash center, as well as the data associated with it.
