

## CHEN'S STORY

Name: Chen

Current Role & Function:

Asia Pacific System Support Manager

Location: Singapore

When I first joined Glory in 2011, there was much less of a focus on system solutions than there is now. After expressing my interest and thoughts to management, I was given the chance to improve on the current operating software, create new software entirely and new systems to run this software.

I was always supported fully, which in turn enabled me to support all those learning how to use and the importance of the new systems I had implemented.

Having succeeded in this area, I am now responsible for growing and supporting a team of skilled system engineers. I am sure that my team and I will be able to overcome any challenges that come our way and exceed expectations in all areas.

I always strive to learn more and am hungry to continue to develop and stretch myself. After 4 years at Glory I am still learning a huge amount on a daily basis. Glory has really given me the opportunity to grow, and they consistently remain open-minded to new ideas and possibilities.

I particularly want to thank Mr Shoji, Mr Sugano, Mr Yamada and all the friends I have at Glory who have continued to support and encourage me throughout my career at Glory.

### KEY ACHIEVEMENTS

- Supported the successful sale of the first RBG-100 in Indonesia
- Supported the successful sale of the first UWH-1000 in Singapore

### CAREER HISTORY WITHIN GLORY GLOBAL SOLUTIONS
