## RBG-100

Teller cash recycler

Whether you're looking to transform your branches or simply improve efficiency for increased profitability, the RBG-100 will support your strategy. Enabling open plan layouts, reduced start / end of day processes, faster teller transactions, redeployment of staff and enhanced customer experience – the RBG-100 delivers.

# RBG-100 teller cash recyclers deliver an intuitive, secure, flexible and integrated teller automation solution to address the real needs of your customers and staff.

**To meet the challenges and gain the competitive edge in today's business environment, successful financial institutions require efficient and proven teller recycling solutions. That means choosing a business partner that provides the latest technology innovations, industry expertise and award winning customer service.**

Glory's new banknote recycling machine, the RBG-100, answers these challenges by providing an efficient high performance cash management solution designed to process customer transactions, ATM replenishment, large deposits and teller vault buys and sells.

## Large banknote capacity

The RBG-100 provides a note capacity of 11,300 that includes approximately a 8,900 recyclable banknote capacity and a secure collection cassette for up to 2,400 notes. The note counting mode can also be used to count different currencies.

## Continuous processing with large hopper

A 300 note feed hopper provides fast processing of large banknote deposits without interruptions and more opportunities for customer engagement.

## Tamper proof cassette

Tamper proof cassettes are secure and can be easily configured by denomination. The collection cassette stores non-recyclable notes for more efficient operation.

## Enhanced security

The UL-291 24 hour safe allows for overnight storage of cash inventory. There is no need to remove cash to an external vault at the end of business hours.
