

GLORY

Simplifying point-of-sale
integration to unlock the full
power of CASHINFINITY™

ALBACON

THE CHALLENGE

Operating within the Czech Republic and Slovakia, Albacon Systems is a long-standing partner of Glory, specialising in the supply and servicing of Glory's cash automation technologies.

The CASHINFINITY cash recycling devices are a preferred solution for retailers seeking to eliminate the need for staff involvement in cash handling at the point-of-sale (POS). Businesses of varying sizes select Glory's solutions to strengthen security, minimise errors, and facilitate efficient daily cash reconciliation.

To automate cash transactions, retailers must integrate their POS software with CASHINFINITY devices at the checkout. This process may occasionally present resource and time-intensive integration challenges.

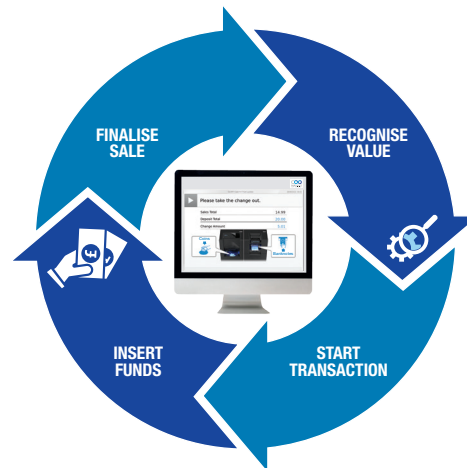

“There are situations where integrating CASHINFINITY devices with customers’ POS systems is either too challenging or not economically practical. This could occur when the customer and the POS supplier cannot agree on a suitable development timeframe, or when integration costs are prohibitive for customised POS systems or a limited number of devices. The good news is that Glory has the tools and expertise to help us address these issues.”

Jaroslav Barták, CEO, Albacon Systems

THE SOLUTION

Created by Glory, CI-ACTIVATE™ links POS applications with CASHINFINITY devices for quick setup and configuration, without the need of a full POS integration. This ‘plug and play’ solution automates cash payments, offers access to transaction data, advanced admin features, and customisable options.

“In situations where existing POS systems cannot be integrated natively, CI-ACTIVATE is an invaluable solution for enabling seamless communication between CASHINFINITY devices and the POS.”

Jaroslav Barták, CEO, Albacon Systems

THE BENEFITS

CI-ACTIVATE enables the seamless integration of CASHINFINITY solutions with POS applications, allowing retailers to fully benefit from Glory’s cash automation technology. This enhances the customer payment experience, optimises operational efficiency, improves in-store security, and results in happier staff, relieved from the stress of manual cash handling.

Further benefits include:

- Simple, out-of-the-box, low-cost integration
- Accurate, fast, and secure reconciliation
- Feature rich functionality
- Real-time device connectivity
