

# The Essential Ingredient for Food & Beverage Success

Point-of-Sale | Self-Service Kiosk | Back-Office | Software

In fast-paced food service, efficiency is everything. Glory's cash-automation solutions enable bars & restaurants, fast-casual, and Quick Service Restaurants (QSRs) to simplify cash handling at kiosks, POS, drive-thru windows, and in the back office—reducing manual tasks and improving accuracy across the entire operation. With flexible integration and support for third-party software, Glory solutions are designed to work effortlessly within any restaurant environment, without requiring major modifications.

## WHY GLORY?

Glory automates your cash operations, allowing tasks that normally take hours to be completed in minutes. Transform your customer experience with self-service kiosks with cash payment options from Glory.

## A GLOBAL LEADER IN CASH AUTOMATION

98% uptime assured by SLAs

92% first-time fix rate

Over 2M devices supported

97% customer satisfaction

4-hour parts response time

Trusted by F&B industry leaders

**Self-Service Kiosks**

Empower guests to order and pay quickly with cash or card. Reduce lines, improve order accuracy, and increase average ticket size.

**POS & Payment Stations**

Flexible, secure payment options at the counter or drive-thru. Streamline checkout and support every guest's preferred payment method.

**Back-Office Cash Management**

Automate behind-the-scenes cash handling. Speed reconciliation, reduce manual processes, improve hygiene, and minimize shrink.

Proven Success

**MCDONALD'S CASE STUDY**

Only globally approved digital-cash solution for McDonald's

- 38% increase in kiosk usage with cash acceptance
- 40% increase in average ticket size vs. card-only kiosks

Golden State Restaurant Group, a leading McDonald's owner-operator, partnered with Glory to overcome labor-intensive, manual cash handling driven by high cash volumes. By deploying UL-certified cash recyclers, CI-100 back-office automation, CI-10X / CI-15X kiosk solutions, and Ubiquitar™ Manage software, Golden State accelerated shift changes and reconciliations, strengthened security, and gained real-time cash visibility. The result was reduced labor strain, smoother operations, and a 14% increase in kiosk usage, improving both employee efficiency and the guest experience.

**Kiosks + Cash: Why It Matters**

One in three QSR guests still pay with cash. Glory ensures you never turn away a sale by accepting cash, card, and digital payments in one seamless experience. Cash recyclers integrate easily with your existing kiosk setup — no major modifications or system overhauls required. Benefits include:

**Customer Choice**

Supports all payment methods; kiosk order size can increase **up to 30%**

**Speed**

Automated cash acceptance reduces lines

**Security**

Closed-loop cash handling reduces cash shrinkage and risk

**Staff Optimization**

Improves labor efficiency; kiosk cash-processing efficiency can increase **up to 90%**
